

# RCCS 2017 Nov 9-10

joint consortium with 5th SPIDTEC2 and 2nd KRAR 2017  
Ciudad Universitaria, UACJ.

Regional  
Consortium for  
Computing Sciences  
and Foundations

## Topics

### Foundation of Computing Systems

- Logic programming and non-monotonic reasoning
- Knowledge representation
- Automated reasoning
- Non-classical logics
- Artificial Intelligence
- Agent and Intelligent Systems
- Cognitive systems
- Natural Language Processing
- Implementation of computing systems:
  - System descriptions, comparisons, evaluations
  - Algorithms and novel techniques for efficient evaluation

### Benchmarks

### Applications of Computing Systems

- Digital security
- Distributed systems
- Software Engineering
- Novel applications in AI
- Cloud Computing and Big Data
- Integration of several computing paradigms
- Languages and algorithms in diagnosis
- Data integration and exchange systems, software engineering and model checking
- Applications to linguistics, psychology and other sciences
- Systems of systems
- Image processing, reconstruction and restoration
- Embedded Systems

## Important dates

- Still you can submit without previous registration. Participate:
- September 15** Full-paper / full-research-summary submission
  - October 9** Notification to authors
  - October 23** Camera-ready submission
  - November 9 - 10** Presentations of accepted works
